PROFILE SNAPSHOT

	Results-driven and inventive Backe	end Engine	er with 4 years of experience b	ouilding so	calable ETL pipelines and cloud-
	native applications. Proven track record delivering Pyt	hon and A	WS-hased microservices in Dev	One and M	aile environments
	Promoted twice for consistent ov				
	Hands-on with containerised syste				
		•	•		
	shipping reliable systems in data-i		•		, ,
	Instrumental in documenting and	implemen		ocus on fu	nctionality, performance,
	and resilience in Agile/Scrum envi	ronments.			
TE	CHNICAL SKILLS				
	Programming Languages: Python,	Javascript	, Typescript		
	Frameworks: Django, FastAPI, Nod	e.js, React	, Angular		
	Cloud Technologies: AWS(Lamda, E	C2, S3, Dyr	namoDB), Docker, Kubernetes, Gi	tLab CI/CI	D.
	Tools: Pytest, Postman, Git, Datad	og			
	Methodologies: Agile, Scrum, Dev	Ops delive	ry, Feature, CI/CD		
	,	•	,		
AF	REAS OF EXPERTISE				
	□ Website Development		Software Testing Life Cycle		Project Management
	□ Software Development		Automation Testing		Team Management & Leadership
	□ Project Delivery	_	Requirements Analysis		Web Services
C	AREER CONTOUR				
	oftware Developer 1 - Software eveloper 2		Associate Programme Analyst - Senior Associate Digital Technology		Python Developer
Δ	rcadia,Inc, Colorado, USA		Data Storm India Pvt Ltd		Bigfix.in
KE	Y DELIVERABLES				
	cadia Solutions, Colorado, United S ckend Engineer - Residential Utili				
	Promoted to Engineer 2 in 2024 f	or leading	infrastructure migration and au	tomation	heavy initiatives.
	Led the migration from Amazon SQ	S to Kuber	netes, significantly improving s	ystem sca	lability and reliability.

Bā	ackend Engineer - Residential Utility Data Squad
	Promoted to Engineer 2 in 2024 for leading infrastructure migration and automation-heavy initiatives.
	Led the migration from Amazon SQS to Kubernetes, significantly improving system scalability and reliability.
	Developed and maintained ETL pipelines for utility data ingestion using AWS Lambda, Python and DynamoDB
	Engineered secure scraping workflows supporting MFA, CAPTCHA, and dynamic login sequences.
	Delivered RESTful APIs and backend microservices for bulk scraping automation and real-time data integration.
	Triaged and resolved utility data system bugs using Datadog, and CloudWatch improving system reliability.

- ☐ Followed Agile practices while collaborating with QA and product teams, improving test coverage by over 10%

As	sociate Programme Analyst - Senior Associate in Digital Technology
	Developed and modules for a career website using Node. is and Angular, enhancing user experience and functionality.
	Implemented a sentiment analysis system using Python to extract insights from user interactions and feedback, improving content engagement strategies.
	Created a Career website, ensuring robust data management and seamless user functionality.
	Designed and implemented an attendance tracker and payroll module, streamlining employee management processes.
	Developed an API platform for storing all API request and response data, optimizing backend operations and enhancing system integration.
	Created a dynamic landing page for Fudge India using React, contributing to the company's online presence and user engagement.
	Responsible for managing the GitLab instance, ensuring version control and collaboration among development teams.
	gFix.in, Chennai, India Aug,2021- Feb,2022 rthon developer
	Implemented a responsive, end-to-end web application with multi-functional capabilities from scratch.
	Developed an interactive UI featuring a QR code scanning capability to retrieve user details.
	Created an activity and group feed to foster user engagement, enabling content sharing within the application.
	Integrated APIs for payment and assessment functionalities, ensuring secure and efficient transactions.
	Designed and developed a RESTful API UI using Django, optimizing backend communication and data handling.
	Managed highly sensitive data with exceptional judgment and discretion, ensuring compliance with data protection
	standards.
